Built to last, built to work!

The IC-F15/S series shows Icom's design. Simple operation for every user. A rugged tool for your daily business. Its resistant to shock and vibration. The IC-F15/S locks the battery pack to the radio. It features a large, Li-Ion battery pack, loud and clear speaker and option unit connector combinations. For performance, the IC-F15/S series offers many options.

Tough and reliable construction

The IC-F15/S series is built around an aluminum die-cast chassis and covered with tough polycarbonate casing. This radio is built to last. Its dual slide rail securely locks the battery to the radio. The battery terminal is covered with a non-corrosive rubber packing. The belt clip is clamped between the radio and the battery, making it nearly impossible to knock loose.

Simple operation

Having only 3 buttons, volume and channel knobs, the IC-F15/S series does not require special training to use. Positive button action for sure operation even when wearing gloves, allows you to get down to the business of communicating without fuss.

Wide frequency coverage

The IC-F15/S series covers a wide frequency range with one version (136–174, 400–470MHz). Wide, middle and narrow channel spacing* is programmable per channel.

(* Programmable 25/12.5kHz or 20/12.5kHz)
