Catch the New Wave in Professional Mobile

Kenwood's TK-7180/8180 offers a superb range of advanced features to play a key role in the latest dispatch and fleet control applications. And if you prefer a radio with full keypad for quick input, just specify Kenwood's TK-7189/8189.

TK-7180/8180

REMOTE CONTROL HEAD (OPT.)

The optional KRK-10 remote kit converts the front panel into a space-saving remote control head for today's smaller vehicles and console mounting.

WIDE BAND OPERATION

The TK-7180/8180/7189/8189 models feature wide band UHF (70 MHz) and VHF (38 MHz) coverage in one radio model.

KENWOOD "K" LARITY — ENHANCED AUDIO

Kenwood utilizes its long standing audio heritage to optimize voice frequency components so that the audio output cuts through typical ambient noise. This enhancement and the compounded noise reduction provide clarity and low distortion.

EXTRA LARGE CHANNEL CAPACITY

The large 512 channel / 128 zone capability* accommodates virtually any current or future capacity requirement.

*Maximum capacity notes

- 128 Conventional Zones cumulative maximum per radio
- 512 Conventional Channels cumulative maximum per radio
- 250 Channels maximum per any Conventional Zone

DUAL PRIORITY & VARIOUS SCANNING FUNCTIONS

Dual-Priority Scan automatically checks two important channels for activity while channel scanning. Also, each radio can be programmed to scan any organization of channels and talk groups using the many programmable scan features and parameters.

DOT MATRIX DISPLAY

The backlighting and high-resolution dot matrix 12-character alphanumeric display provides easy-to-read channel aliases day or night. Also a 3-digit sub-display for zone/channel numbers and icons for function/status indicators make for intuitive operation. The display can be dealer customised for indication in languages other than English.

FleetSync® / FleetSync® II

FleetSync®

Kenwood's FleetSync® digital signalling system includes PTT ID digital ANI for instant radio call identification and Emergency status for personnel safety. FleetSync also includes status messaging, selective calling and short/long text dispatch messaging features. The TK-7180/8180/7189/8189 supports either original FleetSync® or FleetSync® II*.

* FleetSync and FleetSync II are incompatible

5-TONE SIGNALLING

In addition to FleetSync®, the TK-7180/8180/7189/8189 includes the industry standard signalling formats: QT/DQT, DTMF and 5-tone. In particular, 5-tone signalling has been significantly enhanced for greater flexibility, and current users of this format will welcome the fact that it can be used in combination with FleetSync® for Short/Long Text Messaging.

VOICE GUIDE & STORAGE* (OPT.)

This innovative Kenwood option makes several functions possible. "Voice Guide" announces channel, zone, feature activation/deactivation, etc. in a clear synthesised voice. "Voice Storage" records up to 300 seconds of receive audio for missed calls or your own voice for memo recording. It also has an "Auto-Reply" greeting and can record voice messages for unattended radios while away from the radio or while in a meeting (the calling unit must send a FleetSync® selective call for activation).

* Announcement only available in English.

MEETS/EXCEEDS MIL-STD BLOWING RAIN & IP54/55

The TK-7180/8180/7189/8189 is built to survive the hard knocks and harsh weather environments of many type mobile installations. These mobiles meet or exceed the stringent IP54/55 dust and water intrusion standards* and the MIL-STD 810 C, D, E & F environmental standards including the demanding "blowing rain" test.**

*Applies to control head only when KRK-10 kit is installed.

**IP/MIL-STD compatibility requires the KMC-35 or KMC-36 heavy-duty microphone.

REAL-TIME CLOCK FOR TIME STAMPING

A new Kenwood feature, this real-time clock can be used for basic time-stamping.

LONE WORKER

This ingenious feature, provides an extra layer of security and safety for individuals who work remotely as well as for those who work in hazardous areas. As long as the buttons are pressed regularly, the radio operates normally; however, if there is a long lapse (programmable), it will sound an alert. In the absence of further response from the user, the TK-7180/8180/7189/8189 will place an emergency call to a pre-determined person or group of people.

GPS READY (NMEA0183 COMPATIBLE)

The TK-7180/8180/7189/8189 has connection port (internal or external) for GPS receiver unit with a standard NMEA0183 data output. This enables a FleetSync compatible-AVL system to track a fleet of TK-7180/8180/7189/8189 mobiles.

TRANSPARENT DATA MODE

Kenwood's Transparent Data mode works in combination with FleetSync® to enable full character transparency for exchanging data with a transceiver linked

to a PC or peripheral equipment. This can be used for remote control and remote maintenance of status monitoring, etc.

DB-25 ACCESSORY CONNECTOR

The TK-7180/8180/7189/8189 is equipped with a DB-25 Accessory Connector (female), which allows easy connection of external equipment, such as PC, External GPS unit, Data Modem and other various accessories. Remote operation in CAD (Computer Aided Dispatch) command or BCD control is also possible via the connector.

AVAILABLE SOFTWARE (OPT.)

ZVEI-Digital signalling and a voting function that utilises the signalling can be added as optional software.
