

Telecoms

We specialise in supplying best in class products and we are able to offer impartial advice and quality service on all systems. Our personnel are highly trained in all aspects of the Telecoms marketplace. This training enables them to fully assess a customers communication requirements and recommend the most efficient and cost effective system, tailored to meet their specific needs. We do not tie ourselves to any particular manufacturer but offer systems from a number of marketplace leaders such as Vertical communications and NEC/Nitsuko.

Telephone System Installation and Reprogramming

When you order a new communications system from us, rest assured you are in safe hands. We will project manage the entire installation. From initial meetings through to user training and ongoing maintenance, keeping you the customer informed of progress. Liaison with the relevant parties (Network Providers like BT, Building Site Agents, Electricians, Computer Suppliers, your own cabling contractors etc.) ensures a trouble free installation with managing your expectations being our highest priority. It maybe a brand new installation or you maybe unhappy with your current telecoms supplier / maintainer. If that is the case we can work on systems installed by others, but will only send an engineer who is qualified to work on that system. The systems we are able to support include the following;

- NEC/Nitsuko DXE Range
- NEC Aspire
- NEC XN120
- Televantage from Vertical
- Samsung DCS Range
- Siemens Hicom 100 Range
- Siemens Hicom 100e Range
- GPT Masterline DXE Range
- GPT/Plessy Masterline PKS2 Range
- Multitone/Kirk DECT Cordless System
